50X1-HUM

SECRET

_ 2 _

- 3. Charges, percussion caps and shell bases were believed to be supplied by an explosives plant in Sarajevo, the Tito factory in Vogosca or Uzice, and a factory in Zenica. 1/
- 4. The estimated storage capacity of stocks to manufacture ammunition is 10-15 railroad freight cars. Gunpowder supplies are estimated at 3 or 4 truckloads.
- 5. Raw metals are processed in two ore mills about 200 meters outside the actual factory area.
- 6. Deliveries are generally made by factory-owned trucks to the rail-road station at Konjic, where they are transshipped to the destination by rail. Military vehicles also come to the factory frequently to pick up ammunition.
- 7. The Konjic factory is equipped with modern machinery of American and East German manufacture. Technical personnel were sent to East Germany and presumably also to the U.S. to learn how to operate the machinery. No foreign technicians came to the plant as instructors. The factory also has a fleet of 8 10 FAP and TAN trucks. If additional transport was needed, military vehicles, presumably from the garrison at Mostar, were used.
- 8. Plant employees have a dark green entry permit and a factory badge which is a circular insignia with a white outer ring, a red inner field and a black "I" in the center (which must be displayed). Relatives of employees who visit the plant are given a short-term pass and must stay in the so-called dayroom. There is a factory guard which works on three shifts with 5 or 6 men per shift; an additional military guard, composed of one officer and about 40 men, is on duty in the watch towers and outside the factory during the night. The military personnel come from the garrison at Mostar. The watch towers are equipped with searchlights and an alarm system.

Ammunition Factory near KONJIC

(1953 - 1963)

50X1-HUM

- 1. Location:
- (a) The name of the factory is IGMAN PREDUZECE KONJIC.
- (b) It lies in a hilly area, about 1 km SE of KONJIC, as per attached sketch map No. 1 with following legena:
 - 1 the only road, with tunnel through a hill, leading to the factory and connecting factory with KONJIC;
 - 2 road sign, prohibiting unauthorised
 entry;
 - 3 two ore mills outside the factory area;
 - 4 point from which part observation of factory is possible;
 - 5 point from which full observation of factory is possible.
- 2. Description: (a) The factory covers an area of about 1.5 sq. km. It is surrounded by a wire netting fence about 3 m high mounted on concrete posts. The NE part of the factory is separated from the rest by a wire fence.
 - (b) The lay-out is as per attached sketch map
 No. 2 with following legend:
 - 1 porter's lodge and guard room of the factory's protection unit;
 - 2 double-storeyed administrative building
